

Pulsatilla (Puls.)

Ranunculaceae plant family

Appearance; attractive, tall, blonde, thin

Mind:

Changable, abandonment, dependance, affectionate, > consolation, self-pity, lack of confidence, needy, "all over the place", immature, timid, mild, always need more emotional contact, worry about little things, they may have a baby voice, 'stay young', many fears when alone

Children

Starting school separation, 'times of change' - parents separate, wants to be carried, left sided earache

ABANDONMENT
AFFECTION

"POOR ME"

"CUDDLE ME"

worse for: Alone, sun, wet feet, NBWS pill/ antibiotics, fats, puberty, rest, lying, overloading stomach,
better for: open air, discharges, motion, stretching, cold air, erect posture, after a good cry, rubbing, cuddles, hard pressure, consolation

RIGHT SIDED

CHANGEABILITY

Head high; on two pillows, 'princess and the pea'

WEEPING "WHY ME"

Profuse thick bland discharges

FLUSHED

catarrh yellow/ green

Mouth; air hungry; can feel suffociated

Chickenpox where there are breathlessness

Bronchitis; asthma; ear infections

Chilly people

High BP

Cold food and drinks

Good in pregnancy to turn the babies head / breached

Post antibiotics to detox D/D with Med. (Bum in air when lying)

MMR

Renal system; cystitis
causation from wet/ or cold feet

Menstrual problems

Varicose Veins
